# Print on Location Services:

## Option 1: Click & Print Service

**Click & Print** is an amazing new service permitted by our investment in the latest digital technology. Basically, when we click the picture on our camera, the photo can automatically be printed on our high speed, dye sublimation printer. Photos can then be immediately distributed to participants. How fast? A 4x6 in about 30 seconds. A 5x7 in about 40 seconds.

### Advantages over traditional print on location techniques:

- **Much faster print times. No backup at print counter or tracking down participants who have wandered away after their shoot.**
- **Dye sublimation process is the same as commercial photo printing labs. Extremely high quality at extremely high speed.**
- **Look and feel of traditional photographs**
- **Water resistant and fade resistant prints that last decades.**
- **Your logo (or your sponsor's logo) can be imprinted on the bottom corner of the photo at no charge. Great sponsorship opportunity for vendors!**

### Process:

- We set up two studio lights, if space permits, including one octagon professional soft box.
- We set up a traditional background. There is a choice of colors. Or, you can provide a background.
- All lights are fired wireless, preventing accidents and minimizing cords.
- A 10' x 10' space works well. Process can also be utilized at a convention booth for meet and greets.
- If space is tight, studio lights can be replaced by smaller on camera strobes.
- Printer sits adjacent to photographer, on a table, with a laptop computer. Prints are generated as each person files through the line.
- Up to 400 prints per hour can be generated.

*Example:*

## Option 2: Green Screen Print on Location

**Green Screen** is a technology where subjects are photographed against a green background. The background is then removed by the print technician, and any other background is substituted in it's place. Prints are then generated using a similar process as the Click & Print service.

### Advantages:

- **These photos are lots of fun**, and make great take aways from booths, receptions, and events.
- We can **custom design** any background to substitute, in keeping with your theme. Design is included in our quoted rate.
- Your logo, or a sponsor's logo, can be imprinted on the bottom corner of the photo at no charge.
- Real draw to your convention booth or reception.
- Up to 400 prints per hour can be generated.

### Process:

As above for Click & Print, except a print technician sits at the computer to do the digital combination.

This (above) becomes this (larger image) and then printed on location and distributed as participants finish posing. *(background designed for the National Corn Growers Association National Cornfest)*
